Nudge Squidfish Hi Squid! Yes, you are welcome my cosmic friend! This winter these beings have removed their masks literally, so lot of activity has been happening around. It looks like they have finally started to "reward" me and us by showing their maneuvers much more clearly than earlier. Of course I have seen these occurrences also earlier but now even the most biggest stars have been moving without restraint. Are we living in a matrix?? Thank you Squid ☺☺!! PS. Say hello to Punky and thank her for those great captures that you have renovated on your channel!!

@Light Hunter They're not letting me record no matter how close they flyby. I sense they are pissed off about the war. Not sure I understand what is going on? maybe above my pay grade? I'll keep trying. They are giving me info about the war a day or two before it happens. CNN Keeps confirming their info.

Nudge Squidfish Yes, I know the problem; you know what they are and what are their abilities, but instead of it they are willing to give only a little tips of their real habits, that's quite frustrating! A sense of humor is needed LOL!! I think also that they are nervous about the "special project" in U-country and that's why I've been asking for their help as well. Probably this is the reason they have been flying so freely; a specific time needs some specific things to do.. I know that you are good at receiving the info from them, keep up channeling Squid ☐☐

@Light Hunter I will keep you posted of ET Info. I've held this back: "Moscow will meet with terrible freak weather this summer. It will be the summer of hell for Russia". I took it to mean that what they been doing to Ukraine, mother nature will do to them. Hope I'm wrong. Not into more suffering.

Salla, I've been put off sharing this with you because I didn't want to worry folks. On **3/9/2022** the Girls said: "Starting this summer of 2022 till January of 2023 a world wide travel ban hits the world! The roads will be closed down. Only food and doctor travel allowed." I hope they're wrong.
